Quando se trata de computadores, o termo "fraco" é usado para descrever um computador que seja considerado fraco ou com pouca potência. Este nome foi utilizado no Brasil e outros países lusófonos; ali disso vale a pena entender quais características definem os computadores fracos onde você está inserido.

Processador: Um computador Fraco geralmente tem um processador lento, o que significa levar mais tempo para executar tarefas e operá-las. Isso pode ser frustrante para usuários com necessidade de concluir as atividades rapidamente ou eficientemente.

Memória: Os computadores Fraco geralmente têm memória limitada, o que significa apenas alguns aplicativos de cada vez. Isso pode fazer com a desaceleração ou falha do computador ao tentar executar vários programas simultaneamente.

Armazenamento: Os computadores Fraco geralmente têm capacidade de armazenamento limitada, o que significa os usuários podem armazenar uma pequena quantidade dos dados em seu computador.

Isso pode ser um problema para aqueles que precisam guardar arquivos grandes ou um grande número deles.

Gráficos: Os computadores Fraco geralmente têm gráficos integrados, o que significa não serem adequados para jogos ou outras tarefas de uso intensivo.

Isso pode ser um problema tanto dos jogadores quanto daqueles com necessidade do software gráfico.

Customers pay via SMS, mobile, or home phone without providing credit card or bank account details. Once they chose DaoPay as their payment method, they simply call the service number provided or choose to send a text message, and the indicated amount will be directly charged to the phone bill.
