<p>The mathematics of Playtech games works so that the RTP of different slots is always the same. If a player selects a specific game and will play it constantly or change the game, the percentage of returns will always be similar. Thus, it excludes the possibility of finding a "winning loophole."</p>

<p>To create the illusion of victory, mathematics can work in several ways. Thus, at one time, the system has a low percentage of return, after which it is increased or vice versa. In this way, Playtech does not give players the ability to predict when to play and when not.</p>

<p>Through this algorithm, you, as the casino owner, will receive from 18% to 27% of the total income from deposits, and your players will be satisfied with the gain. As a result, you get profits and happy customers at once!</p>

<p>You only need to create a comfortable atmosphere in the club to keep the client in for a long time. Due to the advanced mathematics of Playtech s software, many players quickly get into the game. The system can start handing out prizes to lure new players and gain trust, after which it can generate profits to casinos. This method is the most efficient as it both keeps players engaged and helps operators to increase their revenue.</p>

<p>Operators are always worried whether there is a possibility of bugs in the game or fraud on the client's side. Playtech takes care of safety and creates unique algorithms, which provides unpredictable outcomes. By utilising Playtech Gaming System, you can prevent any fraudulent activities.</p>
