With a cross-platform app, some or even al

l of the source code can be shared across platforms, such as Android and iOS. As  
a result, developers need to code mobile assets only once. These assets will wo

rk seamlessly on all platforms so they don't have to be recoded for each ind

ividual platform.

For Windows computers, you can use a USB cable to co

nnect to the phone. and Tethering and then tap USB teth

ering. Note: Tethering your computer to your smartphone can drain t

he phone's battery, so make sure both devices are plugged into a power outle

t while tethering, and turn off the connections once you're done.
