Formaldehyde, also known as methanal, is an organic

chemical compound and belongs to the aldehyde group of substances. Due to its v

ersatile applicability, it can be found in a large number of different products.

It is mainly used as an adhesive and binder in the construction mat

erials and furniture industry.

Adhesive Bonding is the proces

s of joining two surfaces together, usually with the creation of a smooth bond.

This may involve the use of glue, epoxy, or one of a wide range of p

lastic agents which bond either through the evaporation of a solven

t or through curing via heat, time, or pressure.
