In Geometry Dash, players control the movement of an icon and navigate music-based levels while avoiding obstacles such as spikes, platforms, and Tesla coils. A Tesla coil is a toroidal coil of wire that stores energy in the magnetic field between the torus and the central rod. It is used in the game to create obstacles that can be avoided by jumping or sliding. The Tesla coil is a common obstacle in the game, and it is used to create a variety of challenges for the player. The Tesla coil is a common obstacle in the game, and it is used to create a variety of challenges for the player. The Tesla coil is a common obstacle in the game, and it is used to create a variety of challenges for the player.
