## brasileirao b palpites

<p&gt;Sunja Suj&#225; is the main protagonist of Pachinko, appearing in All&l t;/p&gt;

<p&gt;&lt;/p&gt;&lt;p&gt;To fully exploit the constrained width, avoid loadin g the neighbouring structures and straddle shared utilities running under the si te, the &#128187; house was constructed using a lightweight steel frame on a pi led slab. The steelwork was prefabricated as a series of &#128187; portal frame s that were craned down the alley and site-welded together. Given that every inc h in such a narrow space &#128187; was valuable we chose to fully weld the conn ections and express the frame internally, even utilising the depth of the &#128187; steels to maximise the space.&lt;/p&gt;

<p&gt;Alongside the painted steel a simple palette of spruce plywood, douglas fir joists, terrazzo and cork &#128187; flooring enriches the interior. Extern ally the timber framed walls are clad in handmade pewter glazed brick slips with a patina &#128187; that reflects the changing light of the sky. Both the simpl y landscaped and planted rear courtyard and the garden in &#128187; front of th e house enhance the feeling of space in this small dwelling.&lt;/p&gt; &lt;p&gt;This self-build project had a long gestation, fitted &#128187; in arou nd professional and family life. The design and construction were developed as t ime and money allowed so whilst planning &#128187; consent was given in January 2014 and the ground works commenced in the spring of 2024, the building was not &#128187; completed until August 2024. We worked closely with friend and joine r Michael Tye to lead a small team of local &#128187; subcontractors and employ ed specialist fabricators for certain key packages as well as undertaking a fair amount of the work ourselves.&lt;/p&gt;

<p&gt;The &#128187; result is a unique and highly crafted home that is a tes tament to the commitment, effort and support of many &#128187; people. By repla cing a narrow disused alley with this comfortable small home we hope to have enh anced the streetscape we &#128187; inhabit. As the building completes the terra ce, so does the front garden - with the simple bin store, planting, level &#128187; access and bike parking we aimed to keep it open and reinforce the pavement line without making a hard boundary. &#128187; The development highlights the viability, both economically and spatially of small brownfield sites to provide high quality sustainable development at &#128187; a time of housing shortage. We see it as a model for other seemingly undevelopable urban gap sites where the &#128187; value added is through the quality of the architecture rather than ov

er-development.</p&gt; <p&gt;Material Used :&lt;/p&gt;
