

# O O bet365

Given odds against of an event say A is give to be 7 : 2, therefore probability of A is  $P(A) = \frac{2}{(7+2)} = \frac{2}{9}$  and

probability of B is  $P(B) = \frac{7}{(7+2)} = \frac{7}{9}$ . If it is as in favor of A, the probability of B is  $\frac{7}{9}$ .

what is the probability of B? In fact, the probability of B is  $\frac{7}{9}$ .

Teams take turns to kick from the penalty mark in an attempt to score a goal, until each has taken five kicks. However, if one side has scored more goals than the other could possibly reach with all of their remaining kicks, the shootout ends regardless of the number of kicks remaining.
